A conditional argument

Left paragraph 1: a hypothesis may apply, but does not establish a necessary conclusion. Its condition must remain explicit.

Left paragraph 2: a hypothesis may apply, but does not establish a necessary conclusion. Its condition must remain explicit.

Left paragraph 3: a hypothesis may apply, but does not establish a necessary conclusion. Its condition must remain explicit.

Left paragraph 4: a hypothesis may apply, but does not establish a necessary conclusion. Its condition must remain explicit.

Right paragraph 1: a hypothesis may apply, but does not establish a necessary conclusion. Its condition must remain explicit.

Right paragraph 2: a hypothesis may apply, but does not establish a necessary conclusion. Its condition must remain explicit.

Right paragraph 3: a hypothesis may apply, but does not establish a necessary conclusion. Its condition must remain explicit.

Right paragraph 4: a hypothesis may apply, but does not establish a necessary conclusion. Its condition must remain explicit.

Note 1: this is a synthetic example, not an author quotation.

Limits of the argument

Left paragraph 1: a hypothesis may apply, but does not establish a necessary conclusion. Its condition must remain explicit.

Left paragraph 2: a hypothesis may apply, but does not establish a necessary conclusion. Its condition must remain explicit.

Left paragraph 3: a hypothesis may apply, but does not establish a necessary conclusion. Its condition must remain explicit.

Left paragraph 4: a hypothesis may apply, but does not establish a necessary conclusion. Its condition must remain explicit.

Right paragraph 1: a hypothesis may apply, but does not establish a necessary conclusion. Its condition must remain explicit.

Right paragraph 2: a hypothesis may apply, but does not establish a necessary conclusion. Its condition must remain explicit.

Right paragraph 3: a hypothesis may apply, but does not establish a necessary conclusion. Its condition must remain explicit.

Right paragraph 4: a hypothesis may apply, but does not establish a necessary conclusion. Its condition must remain explicit.

Note 1: this is a synthetic example, not an author quotation.
